

COMMENTS

1. First of all, Professor Jerry Green has a moral obligation to nominate Linh To for Harvard's best teaching fellows awards. This award exists and SHE MUST BE NOMINATED. This class would have not have been as excellent as it was without Linh. The material is very dense and we cover much material in a very short period of time. Sometimes I would be struggling with something in the class for days and then I would go talk to Linh and she would clarify my question in seconds. I learnt Nash Bargaining with Linh in less than 3 minutes. After that, I understood all the graphs and Nash Bargaining problems. Linh cared about being effective during sections hours. She made herself clear and understood. By far, she was the best TF I have ever had in both my undergraduate and graduate classes. I did well in the final exam and I cannot thank Linh (and Jerry, of course) enough.
2. Linh is absolutely fantastic. She is so helpful, both during office hours and outside of class /section time. She repeatedly followed up on my questions over email and in person. She truly a wonderful teacher.
3. Linh is a better teacher than I thought possible. Truly extraordinary. We had several excellent instructors over the year, but Linh stood out as being the best. She is extremely committed, supportive, organized and knowledgeable. Basically, she is a flawless TF as far as I can see. To Linh: I don't really see how you could be any better than you already are, so just keep up the good work!
4. Linh was a wonderful TF. She went above and beyond in preparing all her sections and in getting us ready for our general exams. She was helpful and very responsive with questions outside of section as well. I appreciated the focus on problem solving in sections rather than simply reiterating the concepts. Linh was by far the best TF we had in the first year sequence. My one suggestion would be to move a little slower through some of the material. She wanted to pack so much useful information into each section that sometimes she had to move so fast that it was tough to follow everything
5. She is undoubtedly the best TA I've ever had at Harvard. She knows her stuff and is very smart. Her section is very effective. Plus she is so nice. How can someone have all those qualities at once?
6. Linh's part is excellent. She does a fantastic job clarifying the more nuanced parts from the lecture.
7. Linh has been a phenomenal section leader for this course and has made a heroic effort to help us truly understand the lecture content. She has extended herself beyond the call of duty in every possible way -- from writing detailed and helpful comments in our problem sets to hosting countless office hours. In class, she is an effective teacher and is always fully prepared. My understanding of social choice, cooperative game theory, and mechanism design has improved significantly thanks to her.

8. Best TF of the all year. Without her I probably would have absorbed the material at half the speed. Sections were super useful and complementary to the classes. She always was available for any questions in less than 24h by email. She really cared about us. My only suggestion is to try to introduce and explain the exercises a bit better because sometimes I would get lost in sections. Have suggestions even on how to effectively read and understand Jerry's questions would be useful.
9. I cannot rave enough about Linh. She was a godsend. This last 6 weeks was the hardest of any of our lives, and she was SO INCREDIBLY wonderful. She spent so much time thinking about the material and how best to present it in a way we could absorb quickly, and was so accessible and responsive to our emails, and understood that generals were cumbersome and frightening and did her level best to make sure that we were adequately prepared. She is just wonderful and is the best TF I have ever had.
10. Linh was incredible. She was extremely helpful in preparing for generals, via her sections, her comprehensive sections notes, and her VERY helpful feedback on problem sets. She was also extremely responsive to email, and went above and beyond in answering people's questions. Overall, an incredible TF. My one piece of constructive feedback would be that at times, Linh would just start writing solutions to problems on the board, so that if you looked down for a second, you might not know exactly what she was doing. Overall, though, an amazing TF!!
11. Linh was a great TA and resource for first year in general.
12. My favorite TF this year!!! She's excellent and really put into a lot of effort into this class. And her sections are super helpful in problem solving!
13. Linh was one of the best TFs I've ever had. Her notes were incredibly useful (and I often used them more than the actual lecture notes), her presentation was very clear, and she made really helpful comments on assignments. (And she made really good food for us for the review session!)
14. Linh was outstanding - extremely organized. Very personable, and instilled confidence.
15. best TF of the year!
16. One of the best TAs for the first year sequence. Her notes are organized; the examples she went through in section were very relevant and essential to learning how the concepts can be applied. She's always available to answer questions.
17. Linh was a dedicated and fantastic TF. The best I have had at Harvard.
18. Sometimes more theoretical than problem-oriented. But Linh is so nice and helpful. Fantastic TF.
19. Linh was just fantastic. I don't know how I would have managed the difficult material without her help.
20. Linh was fantastic. She helped us focus on the material that would be most important for the generals, which was extremely helpful. She was always enthusiastic, always available outside of class, and always very friendly. Thanks Linh!

21. Jerry Green's part is very interesting. I am not a theorist by any means but the last part of the micro sequence makes you think about a lot of interesting topics. The other reason why the class was so enjoyable was the TF, Linh To. She is AMAZING. The best TF I have ever had in my academic life. I don't know how I would have done in the exam without her.
22. Linh is really nice and sweet! She's very approachable, and you feel like you could ask her anything - even stupid questions - and she's very willing to help you until you understand them.
23. She's an incredibly helpful TA, besides being very knowledgeable. Great TA choice.
24. One of the best teaching fellows! Unbelievably encouraging while also clear and direct. Your encouragement on our papers, your step-by-step guides on how to find solutions -- terribly valuable! Thank you so much for being so spectacular!!
25. Linh is the best TF we've had this year. I especially appreciated how she would go through every subject in great detail and teach us tricks she's picked up along the way. These tricks were often not found anywhere else, and they often saved a ton of time on exams. She's also extremely dedicated and added extra sections to cover material we needed more time on. Her review section before the general was just excellent. Linh also graded assignments very carefully and left really good feedback. She came to every lecture and changed her sections to complement the lectures. She's just a really responsible TF. I don't understand how a TF can be so dedicated to the course and her students, but Linh does it all. I just hope she will TF another course I take in the future. Thanks a lot for all the help!
26. You're great! Thanks for all of your help :)
27. Linh is very helpful and friendly. Absolutely wonderful section notes!
